### **Scientific production**

Promotor of > 30 PhD students

(Co)author of about 300 international papers

Developer/co-developer of several quality of life/PROMs, and quality of care questionnaires (a.o. EuroQol, Productivity Loss, EuroQol, Mind2Care, ReproQ, child questionnaires)

Developer of several national clinical registries (intensive care, dialysis, perinatal care, postnatal maternity services).

### **Research activities since 2009**

- Large scale urban perinatal and child health development program in the Rotterdam region; combining research and care innovation in Prenatal Medicine, Clinical Epidemiology, Public Health (in particular Child Health) , Health Economics, Psychometrics. Currently focussing on preventive programs.
- National projects on Perinatal Epidemiology, Maternity Care Services, Women's Psychosocial and Mental Health, routine antenatal screening tools. Inequality research (etiologial, interventions). Quality management (external: benchmarking, internal: PDCA).
- Indicators for performance in perinatal care and early youth health care. Both instrument development and implementation with the involvement of clients/patients.
- Questionnaire development, psychometrics currently focussing on PROMs to be used beyond standard economic purposes: individualized treatment decisions, surveillance of treatment, quality of provider/benchmarking.
- Projects for the EuroQol foundation (burden of disease, use of EuroQol for inequity measures, personalized choices using EuroQol information, design and analysis methods for valuation studies.

### **Related activities**

- Chair of the Large Scale Working Group of EuroQol Foundation, see [www.euroqol.org](http://www.euroqol.org). Setting up international projects , involving the use of EuroQol instrument beyond its use as QALY-instrument in pharmaco-economic studies. Involves contracting national/regional organisations (e.g. APERSU in Canada)
- Director of the Mind2Care Foundation (volunteer; non-profit), implements a national professional-based screen-advice IT-tool for routine perinatal care, in particular in deprived areas.

### **Expertise**

- Clinical Epidemiology, Public Health, Health Economics & Technology Assessment, Performance Indicators-Medical Informatics, Psychometrics
- Clinical areas of interest: pubic health, obstetrics, pediatrics, clinical genetics, medical psychology, intensive care, transplantation medicine.

### **Hobby's**

Professional piano and harpsichord playing
